Illustrative bundle view. Fictional case.

Draft with structure

Prepare pleadings and build a Record from reviewed Initial Writ and Defences.

Organise evidence

Create inventories, mark productions and keep both sides' evidence in order.

Find the page

Navigate the digital bundle by production number or return through page bookmarks.

Built around the way you prepare a civil case.

For sole practitioners and litigation teams who want a more coherent route from case papers to a navigable bundle.

01 Start with your case

Pursue or defend. Create an Initial Writ or import existing pleadings. Select the court and carry the parties' details through the document workflow.

02 Bring the pleadings together

Build Defences sentence by sentence. Create an Open Record, track adjustments and generate descriptive Notes of Adjustments. Close the Record or prepare a Minute of Amendment.

03 Keep productions in sequence

Prepare inventories for either party, add production numbers to evidence and import existing packets. Keep the inventory and its documents together.

04 Prepare the next documents

Draft motions, populate associated forms and organise interlocutors and authorities. A dedicated undefended-divorce route supports affidavit drafts and a Minute for Decree pack.

05 Build a bundle you can navigate

Open documents from the index, narrow down inventories through Quick search and save PDF page bookmarks with notes. Download a portable bundle package.
